

SIMULATION -
You need to configure a virtual machine named VM1 to securely access stored secrets in an Azure Key Vault named az400-123456789-kv.
To complete this task, sign in to the Microsoft Azure portal.

Correct Answer: See explanation below

You can use a system-assigned managed identity for a Windows virtual machine (VM) to access Azure Key Vault.

1. Sign in to Azure portal
2. Locate virtual machine VM1.
3. Select Identity
4. Enable the system-assigned identity for VM1 by setting the Status to On.

Note: Enabling a system-assigned managed identity is a one-click experience. You can either enable it during the creation of a VM or in the portal.
